DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a composition of matter comprising a polymer, classified in class 528, subclass 423.
- II. Claims 11-22, drawn to a composition of matter comprising a different polymer, classified in class 528, subclass 423.
- III. Claims 23-25, 41-43, and 44-46, drawn to a composition of matter comprising an oligomer, a block copolymer, classified in class 525, subclass 88.
- IV. Claims 26-30, 47-51, and 52-56, drawn to a composition of matter comprising a different oligomer, and a different block copolymer, classified in class 525, subclass 88.
- V. Claims 31-33, 57-59 and 60, drawn to a composition of matter comprising an oligomer, a block copolymer containing no Nitrogen in the ring, classified in class 525, subclass 88.
- VI. Claims 34-40, drawn to a composition of matter comprising an oligomer, classified in class 528, subclass 423.

The inventions are distinct, each from the other because of the following reasons:

Inventions (I or II) and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different

Art Unit: 1711

modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on different reactants to form different products of different repeating units.

Inventions (III or IV) and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on different reactants to form different products of different repeating units.

Inventions (I or II or VI) and (III or IV or V) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on different reactants to form different products of different repeating units.

Because these inventions are distinct for the reasons given above and the search required for Group (I or II or VI) is not required for Group (III or IV or V), restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1711

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
